

Case Study

# Overview's Servotorq™ Technology Drives Counter Drone Solution

## The Challenge

A specialist CSR (Compact Surveillance Radar) manufacturer required a rapid, precise and highly reliable motion platform for the generation of a new and innovative counter drone solution.

## Overview's Solution

After an initial needs analysis, Overview's system engineers proposed an innovative and cost effective solution based on derivatives of Overview's Atlas™ Servotorq product that fully addressed this international customer's needs for agility, precision and integration.

Prototypes were developed and optimised through an agile, collaborative development phase and product launch dates achieved.

## Benefits to the Customer

Using Overview's expertise in motion control has enabled this customer to focus on their R&D efforts on their core Radar and counter drone expertise and through close collaboration, rapidly bring to the global market an innovative and leading solution in the specialist area.
